PRODUCT INFORMATION

YARD BOOSTER is a liquid plant food containing the **primary** plant nutrients and micronutrients. The micronutrients are chelated with **EDTA** to provide fast break and improve plant availability.

YARD BOOSTER liquid foliar fertilizer was formulated to provide a fast method to boost plants during critical or high growth periods, damage due to weather and for correction of nutrient deficiencies.

YARD BOOSTER promotes seed and root development as well as a strong cell structure when used as a supplement to a soil fertilizer program. Micronutrients are needed for seed development, root structure and cell structure, especially in soils where the nutrients have been depleted in sufficient quantities to cause reduced yields or stunted plants. **YARD BOOSTER** insures against these nutrient deficiencies providing the essential nutrients to stimulate early root development and speed up plant growth.

YARD BOOSTER liquid nutrients contain **ENHANCE[®]** (THA) Technical Humic Acids may increase micronutrient uptake. **YARD BOOSTER** nutrients are available for plant food and non-phytotoxic when used as directed.

GENERAL USE:

1-4 qts. **YARD BOOSTER** in 100 gallons of water per 4000 sq. ft. of yard space.

YARD BOOSTER can be injected into the sprinkler system with the use of a venturi system or fertilizer injection pot.

Small Sprayers: Maximum dilution of 1 pint **YARD BOOSTER** in 5 gallons of water.

Nursery and Greenhouse: 1 qt. per 100 gallons of water.

Transplanting Solutions: 6 oz. per 10 gallons solution.
