

NUTRAPLEX®

COMPLEXED MICRONUTRIENTS

To prevent and correct Micronutrient Deficiencies

0-0-15

GUARANTEED ANALYSIS

Water Soluble Potash (K₂O)..... 15.00%

Potash derived from complexed potassium chloride.
Complexing agent derived from a Lignosulfonate.

PRODUCT INFORMATION

CROPS

NUTRAPLEX 0-0-15 can be applied to most vegetable crops, row crops, deciduous fruit and nut trees, citrus, avocados, grapes, melons, ornamentals, turf, pasture, range grasses and most other crops.

NUTRAPLEX 0-0-15 is a complexed liquid micronutrient for foliar and soil application to agricultural crops. **NUTRAPLEX 0-0-15** is beneficial in combination with plant food and non-phytotoxic when used as directed. It is absorbed through the leafy tissue and root system of the plant and can be translocated within the plant. **NUTRAPLEX 0-0-15** is compatible with most insecticides, fungicides, herbicides, liquid fertilizer, and other foliar micronutrients. It is used on most field and row crops, trees, vines, turf and ornamentals.

NUTRAPLEX micronutrients have corrected deficiencies of a great many row crops, vegetables, and ornamental plants under soil conditions ranging from high organic matter (muck) to very low organic matter and from strong acid soil (pH 3) to high alkaline soil (pH 8.5) containing considerable calcium carbonate (free lime). **NUTRAPLEX** can be effective under most varied farming conditions. Differences in soil conditions, climate and plant varieties will determine how much more effective **NUTRAPLEX** micronutrients are than other sources of micronutrients.

NUTRAPLEX micronutrients are unique in that they can be used in most forms of liquid fertilizers including ammonia solutions. **NUTRAPLEX** micronutrients can be broadcast on the surface of the soil in water solutions in fluid fertilizers including suspensions, or in particulate form. This micronutrient can be banded at planting time, side dressed, or sprayed in water solutions directly on deficient plants. Under irrigation, **NUTRAPLEX** micronutrients can be added to the water of gravity and sprinkler systems. Under dry land, **NUTRAPLEX** micronutrients can be applied ahead of disking, plowing or listing. When applied to soil **NUTRAPLEX** micronutrients can be used in combination with a nitrogen fertilizer source.

APPLICATION RATES

SOIL ONLY

SOIL APPLICATION RATES

MAINTENANCE APPLICATIONS 2-3 gal (8-11 liters) acre
MODERATE DEFICIENCY 3-5 gal (11-19 liters) acre
HEAVY DEFICIENCY 5-6 gallons (19-23 liters) acre

In soil applications the usual carrier is water used at a rate sufficient for through coverage. Nutraplex 0-0-15 can be applied with liquid fertilizers as a broadcast or banded treatment.

SPREADER

Nutraplex 0-0-15 can be used as a spreader at 1-2 quarts (1-2 liters) per 100 gallons (379 liters) of water.

Nutraplex is a Registered Trademark of Western Nutrients Corp
