

NUTRAPLEX[®]

MICRO TURF

COMPLEXED MICRONUTRIENTS To Prevent and Correct Micronutrient Deficiencies

GUARANTEED ANALYSIS

Magnesium (Mg)	1.00%
Iron (Fe)	4.00%
Manganese (Mn)	3.00%

Derived from ferrous sulfate, magnesium sulfate, manganese sulfate.
Complexing agent derived from Lignosulfonate.

PRODUCT INFORMATION

NUTRAPLEX can be applied to most vegetable crops, row crops, deciduous fruit and nut trees, citrus, avocados, grapes, melons, ornamentals, turf, pasture, range grasses and most other crops.

NUTRAPLEX is a complexed liquid micronutrient for foliar and soil application to agricultural crops.

NUTRAPLEX is beneficial in combination with plant food and non-phytotoxic when used as directed. It is absorbed through the leafy tissue and root system of the plant and can be translocated within the plant.

NUTRAPLEX compatible with most insecticides, fungicides, herbicides, liquid fertilizer, and other foliar micronutrient. It is used on most field and row crops, trees, vines, turf and ornamentals.

NUTRAPLEX micronutrients have corrected deficiencies of a great many row crops, vegetables, and ornamental plants under soil conditions ranging from high organic matter (muck) to very low organic matter and from strong acid soil (pH 3) to high alkaline soil (pH 8.5) containing considerable calcium carbonate (free lime). NUTRAPLEX can be effective under most varied farming conditions. Differences in soil conditions, climate and plant varieties will determine how much more effective NUTRAPLEX micronutrients are than other sources of micronutrients.

NUTRAPLEX micronutrient are unique in that they can be used in most forms of liquid fertilizers including ammonia solutions. NUTRAPLEX micronutrient can be broadcast on the surface of the soil in water solutions. In fluid fertilizers including suspensions, or in particulate form. This micronutrient can be banded at planting time, side dressed, or sprayed in water solutions directly on deficient plants. Under irrigation, NUTRAPLEX micronutrient can be added to the water of gravity and sprinkler systems. Under irrigation, NUTRAPLEX micronutrient can be applied ahead of disking, plowing or listing. When applied NUTRAPLEX micronutrient can be used in combination with a nitrogen fertilizer source.

APPLICATION RATES

FIELD CROPS: As a foliar spray use 3 to 8 quarts per acre. Applied to the soil with certain liquid fertilizers, in irrigation water or by itself uses 3 to 10 quarts per acre. These rates may be applied to SORGHUM, CORN, COTTON, ALFALFA, MILLET, HOPS, SUGAR BEETS.

VEGETABLE CROPS: As a foliar spray use 3 to 8 quarts per acre. Applied to the soil with certain liquid fertilizers. In irrigation water or by itself uses 3 to 10 quarts per acre. These rates may be applied to TOMATOES, BEANS, WATERCRESS, LETTUCE, CELERY, RADISHES, PEPPERS, POTATOES, MELONS, ONIONS.

FRUIT AND NUT CROPS: As a foliar spray use 8 to 10 quarts per acre. Apply as a full coverage spray. Applied to the soil with certain liquid fertilizers in irrigation water or by itself use 8 to 16 quarts per acre. CITRUS such as ORANGES, LEMONS, and GRAPEFRUIT apply foliar sprays when spring and fall growth is 4 to 5 inches long. GRAPES—Apply foliar sprays when leaves first appear. WALNUTS - Soil applications preferred. CHERRIES - Foliar sprays may injure certain varieties. Check with your fieldsman. APPLES and PEARS - Do not apply as a concentrate spray. May also treat STRAWBERRIES, PECANS, AVOCADOS, PEACHES, PLUMS, PRUNES, ALMONDS, NECTARINES ORNAMENTALS.

GOLF GREENS, LAWN, AND TURF: Use 1 quart per 1000 square feet. Repeat in 10-14 days or as needed.

COMMERCIAL NURSERY AND GREENHOUSE: Field grown plants use 3/4 to 1 quart per 1000 square feet. Greenhouse benches use 1 quart per 1000 square feet.

Plants in Nursery Yard: Use 1 to 2 teaspoon per gallon (1 to 2 quarts Per 100 gallons of water).

ORNAMENTAL AND FLOWERS SHRUBS: Plants up to 2 feet in height, use 1 % teaspoons per plant. Plants up to 3 feet in height, use 1 tablespoon per plant. Plants up to 4 feet in height, use 2 tablespoons per plant. For larger plants and shrubs use 1/2 to 1 cup per plant.

POTTED PLANTS AND BED PLANTS: 8 inch pot, use 1/3 teaspoon per pot, 12 inch pot, use 3/4 teaspoon per pot. Where plants are grown close together in beds or rows, use 4 ounces (12 tablespoons) per 100 square feet.

CAUTION: The application of fertilizer materials containing molybdenum may result in forage crops containing levels of molybdenum which are toxic to ruminant animals.

Minimum dilution - 1 qt. per 10 gallons of water.
