PRODUCT INFORMATION

START - UP W.R.C.M. Chelate Solution was formulated for use with basic starter fertilizers pH 6 or higher at planting time. **START - UP** W.R.C.M. Chelate Solution can be incorporated in basic liquid fertilizers at time of planting, side dressing application, or other situations where it is difficult to get micronutrients to the root zone.

START-UP is composed of organic carriers of Citric Acid which forms a very strong chelated bond when processed.

W.R.C.M. becomes more available when combined and applied with a good nitrogen source. To insure that maximum uptake is obtained we have incorporated a nitrogen source in our **START - UP** product line..

APPLICATION RATES

Field Crops

Soil Application - Apply 2 to 10 qts. W.R.C.M. CHELATE per acre in starter fertilizer pH 6 or higher. Foliar Application: 1 qt. per 100 gallons of water.

Trees

Soil Application - 1 - 4 qts. W.R.C.M. CHELATE per tree depending on age. Spread uniformly around the tree and water in thoroughly. Foliar Application: 1 qt. per 100 gallons of water in early spring or when leaves are full. Do not apply during bloom.

Grapes -

Soil Application - 2 - 6 qts. W.R.C.M. CHELATE per acre. Foliar Application: 1 qt. per 100 gallons of water. Do not apply during bloom.

IRON (Fe) 1%
Manganese Mn) 1%
Zinc (Zn) 4%
